## **Part One**

### ***1.1 About the Program***

The Bachelor of Science in Nursing (BSN) program was implemented in 2011. The BSN program aims to establish a close relationship between teaching staff members and students, and to provide an educational environment conducive to creativity, outstanding performance, and the acquisition of advanced knowledge and practical skills in the field of nursing. In turn, the BSN program emphasizes providing the best means of education and research that serve the community and become an effective partner in serving the region.

In terms of education, the program provides broad knowledge in various aspects of nursing care, to qualify students to work in many related jobs, such as hospitals, rehabilitation centers, research centers, health centers, as well as in teaching. Through the program, and with a team of highly experienced teaching instructors and qualified students, the BSN program seeks to play an active role in the community and serve the national vision of Saudi Arabia (Vision 2030).

## **1.2 *The Program Vision***

Leadership and excellence in nursing education, scientific research, and community partnership locally and regional.

## **1.3 *The Program Mission***

Providing educational outputs compatible with academic standards to prepare qualified graduates to meet the needs of the labor market and scientific research in nursing to serve the community.

## **1.4 *The Program Objectives***

- Developing the curriculum and its courses to achieve educational outcomes that meet the national academic standards in nursing science.
- Preparing qualified graduates to meet the needs of the labor market.
- Providing a distinguished educational environment that supports self-learning in the field of nursing.
- Producing scientific outputs in the field of nursing through scientific research.
- Providing various services and activities that serve the community in the field of nursing and its application.

## Part Two
