

College of Nursing - Dawadmi

Programs Name: Bachelor of Nursing Science		Course Code: NUR 3516
Course Title: (Maternal and Newborn Health Nursing Clinical)		Credit hours: 5(5+0)
Course Description		
This clinical course is a co-requisite to the theoretical part of maternal –newborn health nursing. Emphasis is placed on applying the nursing process and critical thinking skills as prime frameworks prior to, during, and, following the delivery. The concept of holistic care to the childbearing families is also emphasized. Specific attention is given to exposing students to a variety of situations during lab/clinical experiences to enable them in helping childbearing families to adapt.
