

College of Nursing - Dawadmi

Programs Name: Bachelor of Science in Nursing	Course Code: NUR 3317
Course Title: Pediatric Health Nursing- Theory	Credit hours: 3 (3+0)

Course Description

This theoretical course is designed to provide nursing students with advanced nursing knowledge that enables them to provide care for their pediatric clients competently. The course focuses on the use of the nursing process and critical thinking principles to guide nursing students in providing nursing care to pediatric clients with dysfunctions on respiratory, gastrointestinal, circulatory, hematology, genitourinary, cerebral, musculoskeletal and neuromuscular system. Socio-cultural variations between clients and relevant ethical considerations are addressed in the course.
