

College of Nursing - Dawadmi

Programs Name: Bachelor of Science in Nursing	Course Code: NUR 3518
Course Title: Pediatric Health Nursing- Clinical	Credit hours: 3 (0+3)

Course Description

This clinical course is a co-requisite to the theoretical part of pediatric health nursing. This course covers practical application of knowledge and skills required in nursing care for families with children. Emphasis is placed on the therapeutic nursing interventions for the acute, chronic, actual and potential health alteration in children in the context of holistic approach of care, through exposing student to a variety of situations during lab/clinical experiences. The legal, ethical, cultural, economic, and social factors which affect decision making and outcomes of nursing care explored.
